

CONSTANTIN BRINDUSOIU

Higher Technician in Development of Web Applications

I studied a Advanced Vocational Training in Web Application Development and now I'm studying another Advanced Vocational Training in Multiplatform Application Development because my objective is to be a senior software/web developer. I worked and gained experience in all companies as a developer working with many programming languages, but the most used were PHP and Java. And then JavaScript and Ajax. My desire is to learn more and a stability job.

WORK EXPERIENCE

Java DEVELOPER

06/2021 – PRESENT

Everis/NTT Data

- Development of new components with Spring Boot based on **microservices**.
- Helps to resolve incidents both in front and in back
- I use languages like **Java** with **Spring Boot** and **JavaScript** (**Ajax** and **jQuery**), **Eclipse** for IDE. For the database I use **SQL Developer**, **Jenkins** for continuous code integration, **SVN** for version control, launch **Postman** and **SOAP** requests.

PHP DEVELOPER

10/2020 – 03/2021

CARGESTION

- Provide incidents resolution and new developments in PHP and I used technologies like: **PHP Vanilla**, **Slickgrid.js** and **ztree.js**, **jQuery**, **XML**, **Ajax** , **SVN** for version control and **PhpStorm** for writing code.

LIFERAY DEVELOPER

02/2019 – 11/2019

BESOFTWARE BSW

- Provide incidents resolution and new developments in Liferay 6 and 7. I used technologies like: **Java**, **Spring**, **Hibernate**, **jQuery**, **XML**, **JSP**, **Maven**, **Ajax**, **Hudson** for continuous code integration, **GIT** for version control, **Eclipse** for writing code.
- In other project I created a CMS in **PHP** from 0 using **OOP** programming with **mysqli** connection. As IDE, I chose **NetBeans**.

PHP DEVELOPER

02/2018 – 07/2018

BCS CONSULTORES DE NEGOCIO

- I continued building a CMS initiated before. This application consisted of several CRUDs I've also created a pagination and search box for each CRUD listing. I implemented and used languages like: **JavaScript**, **CSS3**, **Bootstrap**, **MySQL**, **PHP OOP** with **mysqli** connection, I writted the documentation, used the **NetBeans** IDE.
- In addition to this application, I solved incidents for other pages of other clients, pages also created in PHP. For another projects I resolve incidents in **WordPress**.
